

ENGINEERING + INTELLIGENT OPERATIONS

Engineering products. Intelligent operations.

The right products for your environment.
Smarter systems for your everyday operations.

FILTRATION + MONITORING

A focused portfolio for engineering, facilities, controlled environments and business operations.

Products: air filtration, HVAC accessories, monitoring instruments, cleanroom essentials and laboratory equipment.

Automation: task management, sales representation and field service reporting.

Email: info@engimeds.com

The engineering range.

Define the application first. Confirm specifications and documentation in the written quotation.

01 / AIR FILTRATION

Bag filters / Pre-filters / Mesh filters / HEPA filters / Carbon filters / Bag / pocket filters

02 / HVAC ACCESSORIES

Belt-driven fans / Grilles & diffusers / HEPA boxes / Volume control dampers / Exhaust fans

03 / MONITORING INSTRUMENTS

Air particle counters / Magnehelic gauges / Biological air samplers / Low-pressure calibrators / Automatic pressure calibrators / Thermocouples / Infrared thermometers / Airflow meters / Sound calibrators / Sound meters / Light meters / Thermohygrometers / Manometers

04 / CLEANROOM ESSENTIALS

Antistatic cleanroom uniforms / Lint-free cloths / Shoe cover machines / GMP drains

05 / LABORATORY & SUPPORT

Calibrated dead weights / ULV fogger machines / Analytical balances / Scoop sets

Images show the portfolio range. Make, model, dimensions, performance, availability and documentation are confirmed for the selected product.

Connect the work between the messages.

Workflows tailored to your business rules, team roles and approval structure.

01 / AI TASK MANAGEMENT

Assignments, approvals and document evidence.

[Assign](#) > [Review](#) > [Approve](#) > [Close](#)

Connect officers, managers and financial approvers. Link quotations, CAPEX, purchase orders, payment evidence and status updates to the relevant work.

Projects / Procurement / Finance / Operations

02 / AI SALES REPRESENTATIVE

From client inquiry to controlled quotation and follow-up.

[Capture](#) > [Review](#) > [Send](#) > [Follow up](#)

Capture requirements in conversation. Prepare PDF and Excel quotations for manager review; release after approval. Keep purchase orders, invoices and payment follow-ups linked to each inquiry.

Fabrication / Equipment supply / Specification-based sales

03 / AI FIELD SERVICE REPORTING

From technician visit to client confirmation and report.

[Dispatch](#) > [Update](#) > [Confirm](#) > [Report](#)

Assign visits, capture acceptance and arrival, record work details and collect client feedback. Generate a branded PDF service report for the client, manager and technician.

HVAC / MEP / Maintenance / Equipment service

Illustrative service capabilities. The final workflow, integrations, documentation and acceptance criteria are agreed for each project.

Clarity in the requirement. Purpose in the solution.

VISION

To be a trusted partner for businesses seeking practical engineering solutions and greater clarity in their daily operations.

MISSION

To help clients define suitable products and useful workflows through clear requirements, responsible recommendations and agreed delivery standards.

OUR WORKING PRINCIPLES

01 Requirement-led recommendations

Define the application, scope and exclusions before confirmation.

02 Clear commercial terms

Agree price, delivery, payment, warranty and support in writing.

03 Quality through verification

Assess suitability and test workflows against agreed requirements.

04 Confidentiality & controlled access

Define project access and data-handling responsibilities.

05 Responsible AI & human oversight

Retain the agreed approval route for sensitive decisions.

06 Change control & handover

Assess scope changes and make handover responsibilities clear.

Discuss your requirement: info@engimeds.com

Product- and project-specific terms apply as agreed in the written offer.
